EDUCATION

2021-2024
TECHNION – SCHOOL OF
PRACTICAL ENGINEERING

- Practical Software Engineering Diploma
- Final Project Grade: 100/100
- GPA: 93/100

SKILLS

Programming

Java • Python • JavaScript

Frontend

React • React Native • HTML5 •

CSS3

Backend & DB

Node.js • REST APIs • MySQL

Tools

Git • GitHub • Postman • Expo/EAS •

VS Code

LANGUAGES

- Arabic – Native
- Hebrew – Fluent
- English – Fluent

PROFILE SUMMARY

Practical Software Engineering graduate from the Technion with distinction. Experienced in full-stack web and mobile development using React, React Native, Node.js, MySQL, Java, and Python. Passionate about building practical, user-focused software.

PROJECTS

X or Not — Mobile Application

2026

React Native • Expo • Node.js • MySQL

- Designed and developed a mobile app for tracking expiration and opening dates of cosmetics and everyday products.
- Built product management features including categories, expiry calculations, filtering, archiving, and account functionality.
- Developed backend services and database functionality using Node.js and MySQL.
- Implemented AI-assisted product scanning and worked with Expo/EAS, Google Play Console, and App Store Connect for mobile deployment.

Who Is Out — Multiplayer Web Game

2025

React • Vite • Node.js • Express • MySQL

- Developed a bilingual Arabic/English multiplayer party game for groups of up to 15 players.
- Built game functionality including lobby creation, voting, synchronized reveals, and game-state management.
- Developed and deployed the frontend, backend, and database as a complete web application.
- Live: who-is-out-game.onrender.com

School Management System

2024 - 2025

Node.js • MySQL • React

- Developed a role-based platform for teachers, students, and administrative staff.
- Implemented messaging, posts, file sharing, and role-specific functionality.
